INVITATION

THE DOCTORAL SCHOOL OF EDUCATION AT THE UNIVERSITY OF SZEGED, THE SZEGED COMMITTEE OF THE HUNGARIAN ACADEMY OF SCIENCES, COMMITTEE OF LEARNING AND INSTRUCTION, AND THE EDUCATIONAL AND PSYCHOLOGICAL COMMITTEE OF THE HUNGARIAN ACADEMY OF SCIENCES IN SZEGED CORDIALLY INVITE YOU TO AN INFORMAL CONVERSATION

A LIFE IN SCIENCE: REFLECTIONS ON RESEARCH, CAREERS AND THE FUTURE OF EDUCATION IN CONVERSATION WITH STELLA VOSNIADOU

Conversation led by **Lilla Bónus** (Institute of Education, University of Szeged) and **Bence Dobos** (Doctoral School of Education, University of Szeged)

Date: 1 December 2026 (Tuesday) 15:00–16:30 (CET)

Location: Building of the Szeged Committee of the Hungarian Academy of Sciences, Room 110. (Szeged, Somogyi Street, 7.)

Stella Vosniadou is Professor Emerita at Flinders University (Adelaide, Australia) and at the National and Kapodistrian University of Athens (Greece). An internationally renowned scholar in cognitive and educational psychology, she is best known for her pioneering research on conceptual change and on how children and students learn science and mathematics, and her more recent work focuses on self-regulated learning and teacher practices. A former President of the European Association for Research on Learning and Instruction (EARLI) and a member of Academia Europaea and the International Academy of Education, she has received, among other honours, the EARLI Oeuvre Award (2021) and the Humboldt Research Award (2023).

Rather than a formal lecture, the afternoon will be an informal conversation about her path in research, academic careers and the future of education.

Gyöngyvér Molnár

Head of the Doctoral School of Education
University of Szeged

President of the Educational and Psychological Committee of the Hungarian Academy of Sciences in Szeged

Erzsébet Korom

President of the Committee of Learning and Instruction, Szeged Committee of the Hungarian Academy of Sciences
